

CANON A-1

The cameras of today owe a lot to the A-1. Thanks to its amazing features, this camera has remained the ultimate reference for over a quarter of a century. It was one of the first cameras to be completely dependent on battery power. It also has an interchangeable lens and will accept any lens with the Canon FD bayonet mount. The A-1 was the first SLR to offer an electronically controlled programmed auto-exposure mode. Which saves time when snapping photos. The A-1 was a runaway best seller.
